PAM CPD Talk 2012
(National Textile Museum, Kuala Lumpur)

Wednesday, 20 June 2012

Hospital Design for the Future is Now

by Mr. Leswee S.W. Wong

Synopsis of Presentation (provided by the speaker):

The combined demands of climate change and an aging population require a new approach to healthcare delivery. Learn more about the most dynamic trends in healthcare development and strategies for transforming care delivery. How are healthcare systems addressing these needs with their facility planning and expansion strategies? What will the hospital of the future look like? With this new paradigm, we will highlight a model that is sustainable, wellness-centric, and connected to natural cycles. Every healthcare facility grows over time, so the key question is: Is your facility planned to accommodate growth? We will demonstrate:

- 1) how healthcare planning affects ongoing operating costs,
- 2) how the physical space directly impacts the staff, patients and their families,
- 3) how you can understand consumer expectations.

Speaker's biography (provided by the speaker):

As the Director of Healthcare Planning and Design for RVK, **Mr. Leswee S.W. Wong** leads the firm's healthcare projects. With over 15 years of experience, he has had direct involvement with over millions square feet of institutional work. His work experience is comprised of campus and facility master planning, and architectural design for numerous reputable clients in the field of healthcare. Mr. Leswee's proven capabilities also include complex multi-phased renovation projects and his specific interests include sustainability, Lean Design and Evidence-based Design for healthcare facilities.

Mr. Leswee's focus and involvement includes client development, planning and programming, and acting as the Project Architect throughout the project. He works closely with team members early in the design process on major design elements and public spaces to set the character and identity of the building and its surroundings. He takes the lead in design presentations and meetings and plays an active role throughout the construction process.

He and his wife enjoy traveling to their respective homelands, teaching and exposing their two young children about their native cultures and connecting with extended family members.
